Subject: RE: 2011 & 2012 Bathymetry Survey Reports

We are still working on the background and reference definition document. Unfortunately, I don't think we'll have a final document to share with you until late next week, the earliest.

Can we have a call to discuss items 2 and 3? We do have comments from our contractor (CDM) on all of the documents you mentioned. I need to review the FSWP comments to see how significant they are. Comments on the data summary reports are generally minor/not substantial, but I need to review these again too. One exception is our comments on the toxicity report, which I've already forwarded to you.

Ray and I are available later this week or early next week to discuss. We'd like to better understand your schedule and plans moving forward.

Thanks,

Stephanie

I have a TC Meeting on Wed; I am going to be asked about the following:

1. Reference & Background Definitions status
2. Mar 2009 FSWP Comments status
3. FSP 2 Data Summary Reports Comments

Questions - you probably have for me....

1. SSP2 - We are discussing it at the TC Meeting on Wed

2. High Flow CWCM - AECOM has a revised tributary procedure that it has drafted - we have not seen it and they are working on changes to the NBSA sampling

Both reports should be uploaded to EPA's LPR Sharepoint shortly.
